Jim's Place East Restaurant is located at 518 Perkins Ext. at the corner of Poplar Ave in East Memphis.

Message from the Southeast Chair

I have sad news to report concerning Lisa Sloan, our House Committee Chair. Lisa was involved in a very terrible car accident in early February. Lisa remains in critical condition and sad to say is still in a coma. This year Lisa is serving as Chapter Treasurer-Elect and will not be able to perform her duties. The Southeast Chapter is looking for someone to fill her place for the remaining year and transition to Chapter Treasurer next year. Keep Lisa in your thoughts as we wish and pray for a complete recovery.

The Southeast Chapter started the year with the March meeting in Chattanooga. The cocktail hour was sponsored by Colonial Chemical. A very big Thank You to them!

The speaker for the evening was Ashraf Hossain, Business Scientist at Ingredion Incorporated. His presentation was on a novel naturally based deposition polymer – Starch Hydroxypropyltrimonium Chloride (patent pending).

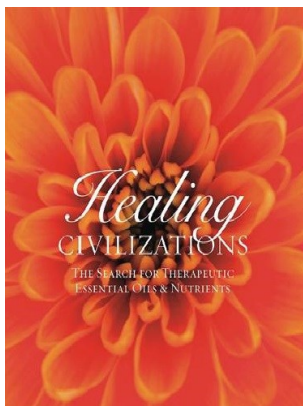

The April 19th meeting will be at Jim's Place East Restaurant in Memphis. Paid registrants will receive a FREE copy of the book authored by our speaker, Nadim Shaath. Nadim's book is titled "Healing Civilizations – The Search for Therapeutic Essential Oils and Nutrients". We encourage all our members to attend.

Also congratulations to Dennis Abbeduto for being elected SCC Area IV Director!

Looking forward to seeing you at the April 19th meeting in Memphis!

Jayesh Patel
SCC Southeast Chapter Chair

April 19th Presentation: Healing Civilizations
The Search for Therapeutic Essential Oils and Nutrients by Nadim Shaath

This book is the culmination of my personal journey around the world over the past 25 years, seeking out and rediscovering essential oils and therapeutic nutrients used since antiquity. In my travels with award-winning photojournalist Thomas Hartwell from Austin, Texas, we scoured the world for the secrets of the past, searching for time-tested natural remedies that were recorded in early pharmacopeias, etched on temple walls, or handed down orally. We met with farmers, scientists, industrialists, and historians in our quest to uncover these ancient treasures of natural healing practices and ingredients. We chronicled our discoveries across time and geography, analyzing dozens of ingredients and techniques using modern instrumentation and cataloguing the data in usable and practical form.

A 9 minute video on the book will be shown along with a brief discussion.

Dr. Nadim Shaath received his Ph.D. in Organic Chemistry from the University of Minnesota. He then joined the Faculty at the State University of New York at Purchase and served as the Chairman of the Chemistry Department at SUNY-Purchase.

He was the President and CEO of KATO Worldwide, a flavor, fragrance, sunscreen and essential oil company and is currently the President of Alpha Research and Development, a research, sourcing and product development company in the fields of essential oils and sunscreens. Alpha has laboratories and warehouse facilities in White Plains, New York, Newark, New Jersey and Ormond Beach, Florida. Alpha promotes proprietary essential oils from Egypt and India.

Dr. Shaath is a frequent speaker/moderator at many scientific meetings and is the author of numerous articles in chemical, flavor, pharmaceutical, cosmetic, food and sunscreen journals and publications. He writes a column in HAPPI magazine entitled "The Sunscreen Filter". He is the author of several books on Sunscreens his new book entitled Healing Civilizations: Therapeutic Essential Oils and Nutrients (Cameron Books, Petaluma, CA) (2017).

The Natural Solution

Biodegradable Exfoliating Beads

Florabeads®, the world's first supplier of biodegradable, natural wax exfoliating beads, offers a variety of microplastic bead replacement options which are proven biodegradable in independent studies.

Ecobeads® are new low cost, botanical scrubbing beads.

Florabeads® are a family of natural wax beads which provide gentle yet effective exfoliation.

Value through expertise

Technical Applications Chemist

JOB POSTING: IMCD is a leading company in sales, marketing and distribution of specialty chemicals and food ingredients. Representing major global producers, our sales people are market focused technical experts who offer solutions for customers' problems utilizing our comprehensive and complementary product portfolio. We provide our partners with optimum tailored solutions for multi-territory distribution management in EMEA, Asia-Pacific and Americas.

Through our people, their expertise and the creation of open and lasting partnerships, IMCD is able to provide advice on formulation, production process and application, thus generating unrivalled growth for our partners. Headquartered in Rotterdam, The Netherlands, IMCD had a turnover of EUR 1,530 M in 2015 and employs over 1,700 professionals in more than 40 countries.

Position Overview

IMCD US seeks a Technical Applications Chemist skilled in the formulation of personal care products for our new Personal Care Laboratory based in Miami, Florida. Under the technical collaboration and/or direction of the Technical Manager, they will develop multiple projects for regional applications in Hair Care, Skin Care, Sun Care and Body Care utilizing ingredients from our core principal suppliers. The Technical Applications Chemist will be responsible for development, technical evaluation, and stability testing on all of their formulations as well as maintaining a database and updating a database containing these formulations.

Additional position requirements include:

- ☐ Able to work within the IMCD US Personal Care team to support business activities including sales formulation/technical support, regulatory questions, troubleshoot customer issues, analyze and interpret data and communicate results/recommendations through written reports and/or presentations.
- ☐ Initiate customer focused projects to demonstrate portfolio with emphasis on providing solutions to customers' problems and collecting competitive data.
- ☐ Develop expertise with respect to the features and relative performance of formulation additives for various markets through extensive testing in the laboratory.
- ☐ Demonstrate customer focus and flexibility and willingness to work with a variety of teams on multiple levels, utilizing problem-solving abilities.

Utilize excellent written and verbal skills in communicating with customers, team members, salespersons and managers.

- ☐ Be a creative individual with a passion for technical learning and curiosity. Successful candidates must be self-motivated, action-oriented and well-organized, with the ability to handle changing priorities in a fast-paced environment.

Continued on next page.

Continued from page 5.

Required Qualifications

- ☐ Bachelor of Science degree- cosmetic chemistry, chemistry, biological sciences or life sciences, required.
- ☐ Formulation experience in consumer goods, preferably with personal care or household products.
- ☐ Ability to develop products from inception to market realization, not just modifications to an existing formula. Must be capable of creating a recipe and not just modifying a known recipe.
- ☐ Strong knowledge base within chemistry and principles of formulating emulsions, cleansing and suspension products. Working knowledge in physical testing and analytical methods.
- ☐ Highly collaborative, driven and self-motivated with a positive attitude
- ☐ High degree of technical curiosity and technical mastery, paired with desire to understand the consumer-need and insight.
- ☐ Problem solver with the ability to handle multiple and changing priorities in a fast paced, dynamic organization.
- ☐ Excellent verbal and written communication skills, with the ability to clearly articulate transfer of thoughts and data. Should be able to convey a project's thoughts, goals and objectives through presentation.

Salary: Commensurate with experience, full-time position with full benefits- Medical, Dental and 401K.
